Description

All LIGHTWIN® fiber optic patch cable adapters are manufactured using special processing methods to create a high-quality product.

These adapters are suitable for all fiber optic applications in a wide range of telecommunications environments. Typical applications include patch panels in data centers, server or network cabinets, as well as FTTH (Fiber to the Home).

By using special alignment sleeves for LIGHTWIN® multimode adapters and specially selected alignment sleeves with minimal tolerances for LIGHTWIN® singlemode adapters, the highest mating accuracy is achieved.

Additional benefits of LIGHTWIN® patch cable adapters:

- Lifetime warranty (LIGHTWIN® Lifetime Warranty)
- 100% tested
- Use of special alignment sleeves with minimal tolerances
- All connector combinations available at short notice on request
