

LKUP E2-E2 SM LSH

High Quality Fiber Optic Adapter, LSH (E2000 compatible), simplex, Singlemode

Features

- Singlemode OS2
- Form factor: SC
- Material: Plastic
- Color: Blue
- One-piece housing
- Mounting option with screws
- Lifetime warranty through Lightwin® Lifetime

Description

All LIGHTWIN® fiber optic patch cable adapters are manufactured using special processing methods to create a high-quality product.

These adapters are suitable for all fiber optic applications in a wide range of telecommunications environments. Typical applications include patch panels in data centers, server or network cabinets, as well as FTTH (Fiber to the Home).

By using special alignment sleeves for LIGHTWIN® multimode adapters and specially selected alignment sleeves with the tightest tolerances for LIGHTWIN® singlemode adapters, the highest fitting accuracy is achieved.

Further advantages of LIGHTWIN® patch cable adapters:

- Lifetime warranty (LIGHTWIN® Lifetime Warranty)
- 100% tested
- Use of special alignment sleeves with the tightest tolerances
- All connector combinations available at short notice on request

General information about fiber optic adapters: A fiber optic adapter provides a detachable connection between two fiber optic patch cables. While a conventional signal in a copper cable can be affected by electrical interference, fiber optic cables transmit using light. They therefore cannot be affected from the outside by electromagnetic interference, nor does a fiber optic cable affect other cables or signals, because it emits no electromagnetic radiation. The low attenuation of optical cables also allows distances of well over 100 km to be bridged.

LKUP E2-E2 SM LSH

High Quality Fiber Optic Adapter, LSH (E2000 compatible), simplex, Singlemode

Description

ged without optical amplification.

Technical Data

Parameter	Value
Adapter design	Simplex
Mounting	Screws
Color	Blue
Fiber category	Singlemode OS2
Material	Plastic
Connector interface 1	LSH (E2000 compatible)
EAN Number	9120117651795
Weight	0.01 kg
